DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-63, drawn to apparatus, classified in class 118, subclass
 410.
 - II. Claims 64-126, drawn to method, classified in class 427, subclass240.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can to be used to practice another and materially different process such as one for applying a cleaning fluid such as water to the moving surface.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to office of Attorney Piontek on 11/18/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1734

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
